

DARWEN VALE HIGH SCHOOL

An Aldridge Community Academy 

6th June 2022

Dear Parent/Carer,

Across KS3 our students will be sitting online progress tests to measure the progress that they've gained in English, maths, science and reading this year. Please see the attached progress test timetable. For this reason, it is crucial that your child/ward is adequately prepared in terms of revision for them to demonstrate their true potential.

As a result of this from Friday 10th June your child/ward will be provided with a range of revision materials/list of topics to help them in being as successful as possible. We would be incredibly grateful if you would support your child/ward in completing these materials in order for them to not only generate as many marks as possible but to support them in building the confidence and resilience that is needed to prepare for GCSE and A level exams later in their school careers.

The outcomes of these tests will also be incredibly important to teachers as they will be used to identify skills, knowledge and understanding that are lacking within each child in order to fill those gaps through targeted teaching strategies in order for them to make even more progress as the academic year comes to a close. The information generated from them will also be used at the start of the next academic year to ensure that any previously taught information is successfully built on and developed.

If you have any questions about the progress tests or if you would like to ask anything about how you can support your child/ward further then please don't hesitate to contact me at the school.

Yours faithfully,

Mr A Venables
Vice Principal
